PRESS RELEASE

Trinity Monster Max 17.5T - Applies to the TEP1506 Series of Motors

Being a manufacturer that is on the leading edge of electric motor technology forces us to push the window constantly and try to develop the best motors we can for our team members and our loyal customer base. The "Monster Max" has been on the market for over 2 years, a year longer than most new car kits, speed controllers, battery packs, tires etc. I understand it is a hardship for our customers that only compete in ROAR events that have to buy new motors to stay current with the present technology which is why we are offering this trade-in policy below. I am sincerely sorry for any inconvenience I have caused all of you. In closing there were at least four manufactures we know of that were flagged by ROAR's random test. All for the same reason. We chose to be pro-active and remove our motor from the ROAR list. I hope we did the right thing but only time will tell.

Monster MAX 17.5T TEP1506 SERIES Motor Trade-In Program
